As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

this. Already we have infections that antibiotics can't cure. Please keep to ban the use of antibiotics when not necessary in animals - necessary to cure a disease, that is, not just to get bigger animals & more meat.

Sincerely,

*Eleanor McIntosh
